DETAILED ACTION

The request for the extension of time and amendment dated 4-19-02 are acknowledged.

Claims included in the prosecution are 50-95.

Claim Rejections - 35 U.S.C. § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

2. Claims 50-95 are rejected under 35 U.S.C. 103(a) as being unpatentable over Green(5,976,577).

Green discloses a process for the rapidly dispersing oral dosage forms wherein the particles are coated with claimed components, The composition contains, other claimed components and the process of preparation involves the mixing of the components and lyophilizing the composition to form particles. (note the abstract, columns 5-8, Examples and claims). What is not disclosed in Green is the range of claimed sizes. However, since Green's preparations are similar rapidly disintegrating particles coated with phospholipids and which dissolve in less than 10 seconds, it is within the skill of the

Art Unit: :1615

art to vary the sizes taught by Green with the expectation of obtain the desired dissolution rates.

Applicant's arguments have been fully considered, but are not found to be persuasive. Applicant argues that the process of Green requires an increase in the viscosity of a suspension of uncoated or coated particles of a pharmaceutically active substance to keep the coarse particles of Green from settling. This argument is not found to be persuasive since instant claims do not exclude this step. Applicant argues that the sizes of the particles in Green are different and that Green teaches away from smaller particle sizes. This argument would have been found to be persuasive if applicant has observed unexpected results in terms of dissolution time of the active agent. However, according to Green, the particles are rapidly disintegrating and disintegrate within 10 seconds or less in the mouth (col. 3, lines 46-50) which is the same as in instant invention as noted from the specification on page 9, second paragraph). The examiner therefore, does not see any criticality of the particle sizes with respect to the disintegrating time.

The declaration previously submitted by applicant has been carefully considered, but has not been found to be persuasive; as already pointed out before, instant claims do not recite the critical process steps leading to the distinct particles formed as argued by applicant.

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, THIS ACTION IS MADE FINAL. See

Art Unit: :1615

MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to *G.S. Kishore* whose telephone number is (703) 308-2440.

The examiner can normally be reached on Monday-Thursday from 6:30 A.M. to 4:00 P.M. The examiner can also be reached on alternate Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, T.K. Page, can be reached on (703)308-2927. The fax phone number for this Group is (703)305-3592.
